SCH No. 2006102033

CSLC EIR No. 737

CSLC File #: W26136, R23505

**NOTICE OF AVAILABILITY OF A
FINAL ENVIRONMENTAL IMPACT REPORT
AND NOTICE OF INTENT TO CERTIFY AN ENVIRONMENTAL IMPACT REPORT**

Pursuant to section 15085 (d), Title 14, California Code of Regulations, this is to advise that the California State Lands Commission (CSLC) has completed a Final EIR for the proposed project described below.

Project Title: PG&E Line 108 Natural Gas Pipeline

Project Location: Construction of the proposed 24-inch pipeline would start in San Joaquin County at the Thornton Station and generally follow the Union Pacific Railroad (UPRR) line or Franklin Boulevard north to the Elk Grove Station in Sacramento County.

Project Description: PG&E is proposing to replace approximately 11 miles of a partially inactive natural gas transmission line, Line 108, which extends from the Thornton Station, just south of the Mokelumne River in San Joaquin County, to the Elk Grove Station, just south of Elk Grove Boulevard in Sacramento County. The proposed new pipeline diameter would be 24 inches. The majority of the proposed Project takes advantage of PG&E's existing land rights by paralleling the partially inactive 16-inch pipeline. A combination of construction techniques would be used to install the pipeline – trench, horizontal directional drill, and hammer bore. PG&E would also install a pressure limiting station at the Elk Grove Station and remove a bridge crossing the Cosumnes River.

An Environmental Impact Report (EIR) identified as EIR No. 737, State Clearinghouse No. 2006102033, has been prepared pursuant to the requirements of the California Environmental Quality Act. On November 30, 2007, the Draft EIR was released for public review and comment, and on March 10, 2008, the Final EIR was released.

Copies of the Draft EIR and Final EIR may be viewed electronically, in Word or Acrobat format, on the CSLC internet website at <http://www.slc.ca.gov>. Copies of the documents are also available for review at the following locations:
